FBI-King Section 38 Serials 3441-3502 69 documents, 152 pp. released

3486 Rifle was test fired, scope not set correctly, targets of test-firing saved in lab. Initials those of Frazier. At 205 feetx the sight had shots about 3" to right of point of focus.

3494 is summary report several aspects investigation. Interesting one is of theft of small plane later found burned in Mexico close to where anonymous calls to MFO said Ray's body would be found and within that time frame. FBI interest in pilot as Ray not in pilot as assassin or connected with assassin.

(This is typical of defect in investigation, all of which was with Ray as assassin, no alternative. Nothing else of interest, nothing else followed. Once print were established as not of Ray there was no other interest in the corpse Bonebrake examined in Mexico, for example.)
